

Platform leader electro-technical applications

YOUR RESPONSIBILITIES:

In this new function, you will take up the final responsibility of the strategic Technology Platform “Electro-Magnetic Applications”, which is focusing on energy efficient solutions, based on advanced materials and technologies.

In your people management role, you will (mostly indirectly) steer and guide a team of highly skilled professionals; you will support them technically but mainly make them aware of market demands and expectations.

In your business management role, you will create and promote vision to your Platform and guide the business development activities and strategy. While further developing the Platform, your focus will be on supporting our industrial partners in the development of electro-magnetic applications and the building of an Intellectual Property portfolio with a view on economic valorization.

But you will also still be an engineer! Your knowledge and expertise in the field of electro-magnetic applications will act as a beacon for your R&D colleagues.

YOUR QUALIFICATIONS:

You have a Master Degree (PhD is an asset) in electro-mechanical engineering and/or electro-technics with a strong focus on electro-magnetic applications.

Strong knowledge and several years (at least 7 to 10) of work and/or research experience in the field of electrical power technology in general and more specific in the fields of electro-magnetic applications in the low frequency domain (rotating and stationary electrical machines, transformers, generators, electric engines or other electro-magnetic applications).

Mature personality with sufficient independence.

Strong people management skills and ability to shape a division and to create, fine tune and promote a vision.

Knowledge of and experience with principles of budgeting and finance.

Strong customer focus and commercial spirit to further develop the markets and partnerships within the field of electro-magnetic applications.

Scientific pride and integrity.

Entrepreneurship.

Excellent communication skills, dealing with team members, management, customers, ...

LANGUAGES:

English: fluent (speaking and writing)

Dutch: willing to learn for daily social life

German& French: acceptable level
